

Quamby Plains

Est. 1917

Free freight to designated Victorian drop points

Ram Sale - 1pm Monday 17th November 2025

Sale interfaced with AuctionsPlus

- Improved carcase traits
- High percentage of lambs to ewes joined
- Moderate adult ewe weight
- High yielding, low micron wool

CORRIEDALE PERFORMANCE GROUP

The **Corriedale Performance Group** is a group of like-minded Corriedale breeders working together to improve the breed and producing what modern sheep breeders require from dual purpose sheep.

Performance Group Corriedales produce mid micron wool, have sound structure and better genetics.

They focus on improved growth rate and muscle development, and high fertility, all of which means more profit for both lamb and wool.

They also have improved hybrid vigour when crossed with other breeds.

PERFORMANCE RECORDING

Performance recording is a key feature of the Corriedale Performance Group

Measurements focus on three areas:

1. **Reproduction** – number of lambs weaned per ewe joined
2. **Growth** – maximising early growth rate without increasing adult ewe weight
3. **Wool** – fleece weight, fibre diameter, wool strength

INNOVATIVE MARKETING STRATEGY

The **Corriedale Performance Group** have a system for ranking their rams based on the Maternal Wool Production Plus (MWP+).

Performance Group breeders aim to use only gold standard rams in their own flocks.

As the sheep improve every year the requirements for gold are constantly increasing.

GOLD MEDAL
The top 10% rams ranked
on the MWP+

SILVER MEDAL
The top 20% rams ranked
on the MWP+

QUAMBY PLAINS PERFORMANCE CORRIEDALES

Quamby Plains stud was founded in 1917 by Compton Archer. The stud currently runs 475 ewes and is run under commercial conditions, alongside 3,500 Corriedale flock ewes. Our objective is to produce sheep with good early growth, high muscle, positive fat, low micron heavy cutting soft white wool and high % of lambs to ewes joined. We believe this makes a very profitable sheep enterprise in today's market.

Shearing

All rams are shorn on the 4th of March to put them on an equal footing and make the fleece results a genuine representation. The rams are then shorn again on the 1st August, when all fleeces were weighed and tested. The average micron for the sale drop flock is 23.1.

Health Status

This stud is Brucellosis Accredited free and Quamby Plains rams are vaccinated for OJD and have been vaccinating since 2009.

Freight

Free freight to designated Victorian drop points.

Feed

All rams are 100% grass fed.

Rebate

3.5% Rebate to outside agents introducing buyers in writing 24 hours prior to sale and settling within 7 days of date of invoice.

Sires

22-0053 – Currently the number 1 sire in Australia - MWP+ 177.8. A sire with great shape and square hind quarters. Top 5% for PWT, PEMD and WR. Top 10% for MWWT.

22-0029 – Currently the number 3 sire in Australia – MWP+ 174.5. Quamby Plains' top sire for fleece weight and excellent wool quality. He is breeding exceptional well. Top 5% for PWT and top 20% for YGFW.

23-0032 – MWP+ 172.7. Young sire chosen for YFD and PEMD, as well as fertility.

23-0183 – A sound young sire. Top 5% for YGFW and 10% for PWT.

23-0093 – A son of 220053, who has breed very well. Top 5% for WR and 20% for PWT, MWWT and PEMD.

22 -0459 – A sire chosen for his fleece weight, fine micron and excellent growth. Top 5% for YFD and top 10% YGFW.

22 -0456 – A sire chosen for fleece weight and fertility. Top 10% for YGFW and top 20% for WR.

22 -0389 - A sire chosen for his carcase quality. Top 5% for Shear Force and top 20% for IMF.

21-0429 – An older sire breeding very well and chosen for his elite low micron wool. Top 5% for YFD, PWT and top 10% for WR.

21-0211 – A sire with great body shape, that is breeding exceptionally well. Top 5% for MWWT, PEMD and top 10% for WR.
